

360° Asset Intelligence

ENERGY AND SUSTAINABILITY MONITORING

Webee's pre-built Energy and Sustainability Monitoring App empowers users to monitor and forecast energy consumption variables. It also grants immediate access to your operations current impact in terms of carbon footprint.

Quickly identify key variables such as energy consumption and carbon footprint:

Energy Consumption

Take a quick look at the current energy status, including on/off on main power, current demand and forecasted consumption.

Expected Consumption Variance

Get an estimate of monthly energy consumption variance and know at a glance how much more (or less) you're consuming.

Carbon Footprint

Instantly get a metric on tons of CO₂ that your operation has generated during the month.

Historical Consumption

Get access to historical energy consumption data right from the dashboard.

THE GLOBAL GOALS

WE SUPPORT THE UNITED NATIONS' SUSTAINABLE DEVELOPMENT GOALS
